

Wyoming Department of Education Required Virtual Education Course Syllabus

Niobrara County School District # 1

Program Name	Wyoming Virtual Academy	Content Area	SS
Course ID	HST-020V2-AVT	Grade Level	9-12
Course Name	Psychology	# of Credits	0.5
SCED Code	04254G0.5011	Curriculum Type	K12 Inc

COURSE DESCRIPTION

Generally offered second semester. Students explore scientific methods of research as well as the major schools of psychology as they relate to issues of aggression, addictive behavior, memory, interpersonal relations, and self-care. Topics include the importance of ethics in scientific study, psychology's application to daily life, the influence of cultural background on perception, and more.

WYOMING CONTENT AND PERFORMANCE STANDARDS

STANDARD#	BENCHMARK (Standard/Indicator) Use the Standards and Benchmarks as Spreadsheets
HE12.4.4	Explain signs of stress and how stress can affect health status. ME, ATOD
HE12.4.7	Evaluate the appropriateness of various strategies for managing stress and avoiding stress overload in specific situations (e.g. regular exercise to deal with divorce, regular sleep prior to testing, etc.). PA, NUT, PH
HE12.4.12	Analyze the relationship between physical, social, and mental and emotional health. VP/B, CEH ME
HS-LS1-2	Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multi-cellular organisms.
HS-LS1-3	Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.
HS-LS3-1	Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.
SS12.2.1	Analyze and evaluate the ways various groups (e.g., social, political, and cultural) meet human needs and concerns (e.g., individual needs and common good) and contribute to identity (e.g., group, national, and global), situations, and events.

SCOPE AND SEQUENCE

UNIT OUTLINE	STANDARD#	OUTCOMES OBJECTIVES/STUDENT CENTERED GOALS
Unit 1: History and Methods 1.01 Introduction		Upon completing this unit, students will: define psychology understand the roots of psychology understand the importance of studying psychology as a science understand and apply the theories of psychology understand and demonstrate the ways psychology is studied

<p>Unit 1: History and Methods 1.01 Introduction</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> define psychology understand the roots of psychology understand the importance of studying psychology as a science understand and apply the theories of psychology understand and demonstrate the ways psychology is studied
<p>Unit 1: History and Methods 1.02 Early Attempts to Understand Behavior</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> define psychology understand the roots of psychology understand the importance of studying psychology as a science understand and apply the theories of psychology understand and demonstrate the ways psychology is studied
<p>Unit 1: History and Methods 1.02 Early Attempts to Understand Behavior</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> define psychology understand the roots of psychology understand the importance of studying psychology as a science understand and apply the theories of psychology understand and demonstrate the ways psychology is studied
<p>Unit 1: History and Methods 1.03 First Psychology Laboratory</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> define psychology understand the roots of psychology understand the importance of studying psychology as a science understand and apply the theories of psychology understand and demonstrate the ways psychology is studied
<p>Unit 1: History and Methods 1.03 First Psychology Laboratory</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> define psychology understand the roots of psychology understand the importance of studying psychology as a science understand and apply the theories of psychology understand and demonstrate the ways psychology is studied
<p>Unit 1: History and Methods 1.03 First Psychology Laboratory</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> define psychology

		<p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.04 Theories and Approaches</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.04 Theories and Approaches</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.04 Theories and Approaches</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.04 Theories and Approaches</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.05 Research Methods and Ethical Concerns</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p>

		<p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.05 Research Methods and Ethical Concerns</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit Review</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 1: History and Methods</p> <p>1.05 Research Methods and Ethical Concerns</p>		<p>Upon completing this unit, students will:</p> <p>define psychology</p> <p>understand the roots of psychology</p> <p>understand the importance of studying psychology as a science</p> <p>understand and apply the theories of psychology</p> <p>understand and demonstrate the ways psychology is studied</p>
<p>Unit 2: Biological Basis</p> <p>2.01 Introduction</p>		<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>
<p>Unit 2: Biological Basis</p> <p>2.02 How the Brain is Studied</p>		<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>

<p>Unit 2: Biological Basis 2.03 The Brain</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
<p>Unit 2: Biological Basis 2.03 The Brain</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
<p>Unit 2: Biological Basis 2.03 The Brain</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
<p>Unit 2: Biological Basis 2.04 The Neuron and the Nervous System</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
<p>Unit 2: Biological Basis 2.04 The Neuron and the Nervous System</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
<p>Unit 2: Biological Basis 2.04 The Neuron and the Nervous System</p>		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron

		<p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>
<p>Unit 2: Biological Basis</p> <p>2.05 Sensation</p>		<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>
<p>Unit 2: Biological Basis</p> <p>2.05 Sensation</p>		<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>
<p>Unit 2: Biological Basis</p> <p>2.06 Perception</p>		<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>
<p>Unit 2: Biological Basis</p> <p>2.07 Consciousness</p>	<p>HS-LS1-2, HS-LS1-3, HS-LS3-1</p>	<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>
<p>Unit 2: Biological Basis</p> <p>2.07 Consciousness</p>	<p>HS-LS1-2, HS-LS1-3, HS-LS3-1</p>	<p>Upon completing this unit, students will:</p> <p>identify the parts of the brain</p> <p>understand and identify the parts of a neuron</p> <p>understand how our senses collect and interpret information</p> <p>understand transduction</p> <p>understand how we perceive</p>

Unit Review		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
Unit 2: Biological Basis 2.07 Consciousness	HS-LS1-2, HS-LS1-3, HS-LS3-1	<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> identify the parts of the brain understand and identify the parts of a neuron understand how our senses collect and interpret information understand transduction understand how we perceive
Unit 3: Learning and Memory 3.01 Introduction		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.02 Classic Conditioning		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.02 Classic Conditioning		<p>Upon completing this unit, students will:</p> <ul style="list-style-type: none"> understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them

		understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.02 Classic Conditioning		Upon completing this unit, students will: understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.03 Operant Conditioning		Upon completing this unit, students will: understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.03 Operant Conditioning		Upon completing this unit, students will: understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.03 Operant Conditioning		Upon completing this unit, students will: understand how learning takes place distinguish between the different theories of learning see modern day applications of learning understand the basic memory model apply the memory helps understand memory errors and how to avoid them understand the parts of the brain associated with memory
Unit 3: Learning and Memory 3.03 Operant Conditioning		Upon completing this unit, students will:

		<p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p> <p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
<p>Unit 3: Learning and Memory</p> <p>3.04 Social-Cognitive Learning</p>		<p>Upon completing this unit, students will:</p> <p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p> <p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
<p>Unit 3: Learning and Memory</p> <p>3.04 Social-Cognitive Learning</p>		<p>Upon completing this unit, students will:</p> <p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p> <p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
<p>Unit 3: Learning and Memory</p> <p>3.05 Memory</p>		<p>Upon completing this unit, students will:</p> <p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p> <p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
<p>Unit 3: Learning and Memory</p> <p>3.06 Retrieval and Forgetting</p>		<p>Upon completing this unit, students will:</p> <p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p>

		<p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
Unit Review		<p>Upon completing this unit, students will:</p> <p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p> <p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
Unit 3: Learning and Memory 3.06 Retrieval and Forgetting		<p>Upon completing this unit, students will:</p> <p>understand how learning takes place</p> <p>distinguish between the different theories of learning</p> <p>see modern day applications of learning</p> <p>understand the basic memory model</p> <p>apply the memory helps</p> <p>understand memory errors and how to avoid them</p> <p>understand the parts of the brain associated with memory</p>
Unit 4: Development and Individual Differences 4.01 Introduction		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about development</p> <p>Understand the factors that allow for individual differences</p> <p>Critically look at the developmental issues talked about above</p>
Unit 4: Development and Individual Differences 4.02 Issues, Methods, Prenatal Development and Infancy		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about</p>

		<p>development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.02 Issues, Methods, Prenatal Development and Infancy</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.02 Issues, Methods, Prenatal Development and Infancy</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.02 Issues, Methods, Prenatal Development and Infancy</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.02 Issues, Methods, Prenatal Development and Infancy</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes</p>

		<p>that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.03 Childhood and Adolescence</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.03 Childhood and Adolescence</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.03 Childhood and Adolescence</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for</p>

		<p>individual differences</p> <p>Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.04</p> <p>Adulthood</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about development</p> <p>Understand the factors that allow for individual differences</p> <p>Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.04</p> <p>Adulthood</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about development</p> <p>Understand the factors that allow for individual differences</p> <p>Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.05</p> <p>Personality and Individual Differences</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about development</p> <p>Understand the factors that allow for individual differences</p> <p>Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.05</p> <p>Personality and Individual Differences</p>		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p>

		<p>Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.06 Testing and Individual Differences</p>	<p>HS-LS3-1, SS12.2.1</p>	<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.06 Testing and Individual Differences</p>	<p>HS-LS3-1, SS12.2.1</p>	<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.06 Testing and Individual Differences</p>	<p>HS-LS3-1, SS12.2.1</p>	<p>Upon completing this unit, students will:</p> <p>Understand the stages of development Understand the physiological changes that occur over the life span Understand the cognitive changes that occur over the life span Understand the social changes that occur over the life span Understand the research that has sought answers about development Understand the factors that allow for individual differences</p>

		Critically look at the developmental issues talked about above
Unit Review		<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about development</p> <p>Understand the factors that allow for individual differences</p> <p>Critically look at the developmental issues talked about above</p>
<p>Unit 4: Development and Individual Differences 4.06</p> <p>Testing and Individual Differences</p>	HS-LS3-1, SS12.2.1	<p>Upon completing this unit, students will:</p> <p>Understand the stages of development</p> <p>Understand the physiological changes that occur over the life span</p> <p>Understand the cognitive changes that occur over the life span</p> <p>Understand the social changes that occur over the life span</p> <p>Understand the research that has sought answers about development</p> <p>Understand the factors that allow for individual differences</p> <p>Critically look at the developmental issues talked about above</p>
<p>Unit 5: Stress and Mental Health</p> <p>5.01 Introduction</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health</p> <p>5.02 Stress</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p>

		<p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health 5.02 Stress</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health 5.02 Stress</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health 5.03 History of Abnormal Behavior</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p>

		<p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health</p> <p>5.03 History of Abnormal Behavior</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health</p> <p>5.03 History of Abnormal Behavior</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p> <p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
<p>Unit 5: Stress and Mental Health</p> <p>5.04 Disorders</p>		<p>Upon completing this unit, students will:</p> <p>understand what stress is and its effects</p> <p>understand the difference between good and bad stress</p> <p>understand and be able to use coping mechanisms</p>

		<p>understand the difference between normal and abnormal health</p> <p>understand what mental illness is and its effects</p> <p>understand the mental illnesses that affect society today</p> <p>understand the history of mental illness</p> <p>understand the treatment options available</p>
